About us

FROSTWOLF is one of the leading IT Projects Management, IT Outsourcing and IT Consulting companies in Romania.

Our company was born in 2010, led by an over 20 years experienced manager in IT. FROSTWOLF had become soon a worthy player on IT services market, dynamically expandable to please the customers.

We work with top executives to help them make better decisions, convert those decisions to actions, and deliver the sustainable success they desire. With a history of over 15 years in Information Technology, our management team build strategies on the fly for achieving better results for the clients—results that go beyond financial and are uniquely pragmatic, holistic, and enduring.

FROSTWOLF is a Virtual CIO for their clients.

Our Mission

FROSTWOLF's mission is to provide bright technology ideas and to deliver outstanding quality in IT services and solutions, covering present and future

Our Vision

Our vision is to provide seriousness, reliability, commitment, responsibility and intelligence, while developing new ways to decipher the future of Information Technology.

IT WORKS FOR YOU ?

Starting FROSTWOLF in 2010 we have quickly evolved as a company. We built out team, we made ourselves known and we offered from the beginning best IT services on the market. We signed partnership agreements with major software and hardware companies in Romania and in the world, to be able to offer to our clients best services and solutions for their business.

In partnerships, we have a strong relationship with Microsoft, Cisco, Intel, Fortinet, HP, Comodo, Lenovo, Xerox, Eset, Apple and many others. These partnerships allow our company to implement smart solutions to customers, while keeping the highest standard of quality combined with adaptive ideas to help us grow our business beyond the nearby future.

Cyber Security

In a world of computers, where information is preponderant digital, access to information had become as much as a necessity as a danger. Information security is to be handled on several levels: infrastructure, network equipments, physical access, protection against viruses, malware, ransomware, e-mail protection, mobile equipments and appropriate software licensing.

IT WORKS FOR YOU ?

IT Projects and Consultancy

Starting with infrastructure and network security audit and finishing with budget management and optimization, we provide:

- IT investment strategies for small and medium companies;
- IT solutions for business continuity;
- On demand, "all-day" on-site IT services;
- IT projects planning and implementation;
- Technology search: new product and technology search appropriate for the business segment in which you reside. Someone, somewhere, may have already invented the solution required for your company;
- IT training on demand - for use of your employees at their full capacity;
- Internal IT policies for your employees;

IT WORKS FOR YOU ?

IT Outsourcing Services

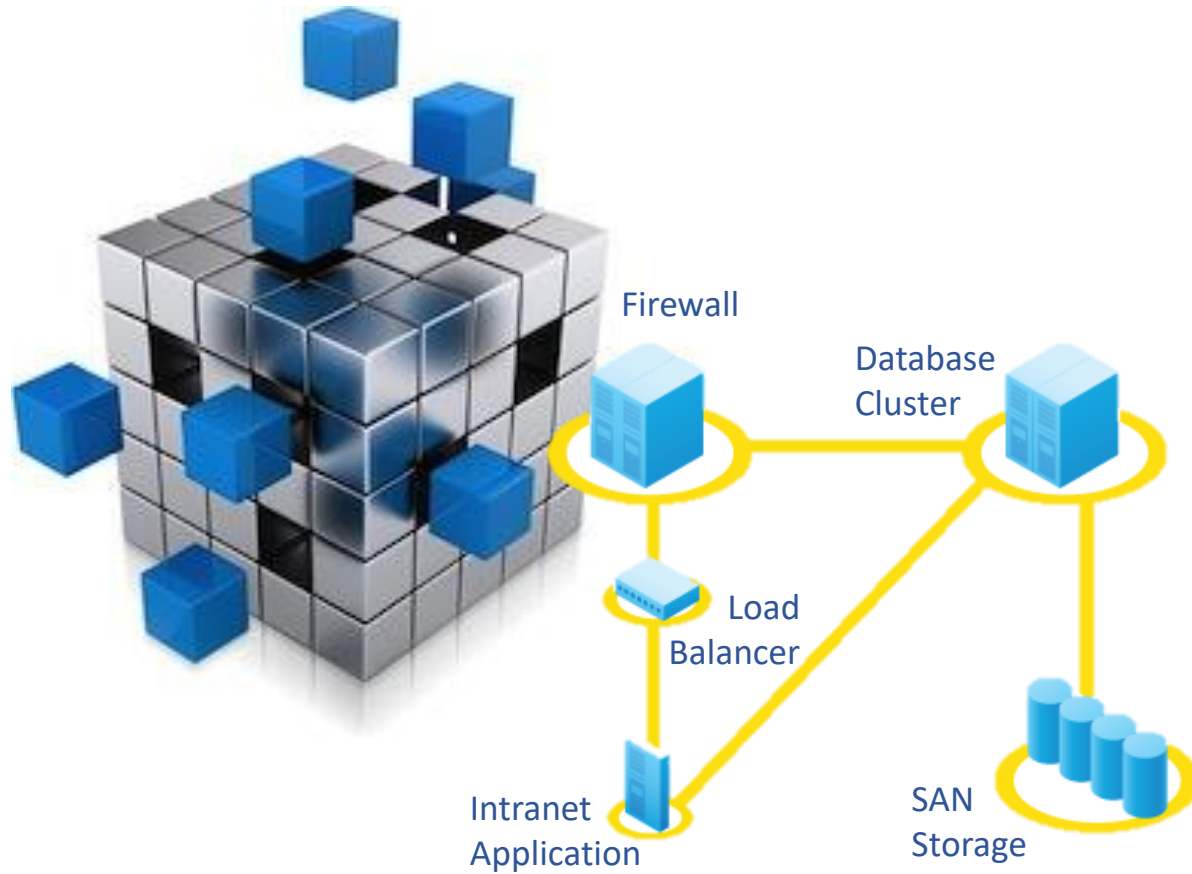

Organizations turn to IT outsourcing for any number of reasons, and to fulfill a variety of needs. Whether the goal is to obtain expertise or to reduce costs, to offload application maintenance or help desk operations, outsourcing is to stay.

We offer outsourcing services are based on customer approved SLA. In doing so, we offer :

- the right performance to ensure that the client is receiving its required level of service and the service provider is achieving an acceptable level of profitability;
- SLA metrics can be easily collected with an appropriate level of detail but without costly overhead, and
- tie all commitments to reasonable, attainable performance levels so that "good" service can be easily differentiated from "bad" service, and giving the service provider a fair opportunity to satisfy its client.

IT WORKS FOR YOU ?

Servers/Network architecture

Careful planning is the key to performance. And performance in IT architecture is the total of details that leads to a solid, longevive and maximum return of investment infrastructure that can be obtained.

FROSTWOLF services includes, but do not resume to:

- Hardware configuration and the quality of equipments;
- Choosing the right software;
- Strategy for not depending of certain equipments;
- Quality of materials used in passive networking;
- Active and passive backup plan for your business;
- "Business continuity" plan;

Networking and Security

Having a past history of information networks evolution from BNC to FiberLink and from basic scripting firewalls to complex ACL's configurations, we cover a wide range of services in networking and information security :

- Projects for structured networks
- Structured networks implementation
- Advanced router configuration (Cisco, Fortinet, SonicWall etc.)
- VLANs implementation
- VPN configuration (SSL and IPSEC)
- DNS management
- Border Gateway Protocol implementation (iBGP and eBGP)
- Enhanced Interior Gateway Routing Protocol (EIGRP) implementation
- Purchase of active/passive network equipment
- Access Lists configuration (ACLs)
- Software firewalls configuration (Microsoft ISA Server, Forefront Threat Management Gateway etc.)
- E-Mail Anti-Spam solutions implementation
- Mail and web cryptography using Security Certificates
- Network Services Security Audit (internal and external)

Internet Services. Datacenter Hosting.

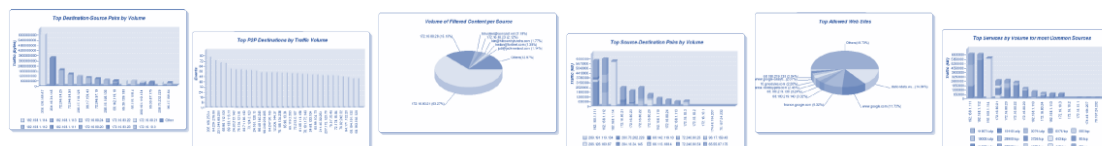

Being in partnership with the best internet provider in Romania is a great deal of advantage on the market. Their Data Centers offer outstanding quality and the internet connection is one of the best in Europe assuring reliable nodes to the rest of the world.

We can offer mail, web and database hosting on our servers or host a client server with a reliability and uptime of over 99.7% per year, making this service a "most wanted".

Combined with best maintenance services, great security and competitive prices, we are offering this service as an addition to our Outsourcing Services, building for the client the reliability it seeks for the safety of his business.

IT WORKS FOR YOU ?

Digital Signage

The concept of "Digital Signage" is used to display multiple multimedia content on monitors / TVs.

Innovation in this solution lies in centralizing multimedia content and its distribution in an organized way. The system can be created to support any display.

"Digital Signage" finds its application in showrooms, shops, malls, advertising spaces, etc.

FROSTWOLF implements "Digital Signage" systems for any needs, using in some cases solutions provided by our software and hardware partners.

Web Applications and Design

If you are not on web, you don't exist ! Today's marketing options are more and more on the internet. To build yourself a web application has the advantages of low marketing budget solution and high applicability as internet had become an dependence in business all over the world.

With a dynamic programmers team and with coverage over most of the technologies used for building web applications, we provide secure services covering :

- Presentation web sites;
- Newsletters and web sites design;
- Specialized sales web applications;
- Internal company use web applications;

Additional to above services we provide SEO optimization and web promotion to our customers.

IT WORKS FOR YOU ?

Ticketing Support System

To keep track of the problems we engage and to continuously allow our customers to monitor our activity, we designed a smart web application for problem reporting and handling. Our support team receives on their smartphones email notifications for new arriving incidents. This way, intervention time goes straight to minimum, eventual problems being solved in record time on-site or remotely.
